- ✓ Experience with all major OEM filter systems.
- ✓ Fast and efficient performance = shorter downtime.
- ✓ Rapid reaction from your local KAY.SERVICE<sup>®</sup> team.
- ✓ Efficient manufacture, supply and project management of filter bags, cages and service work all under one roof.

# WITH OUR SERVICE YOU MINIMIZE COSTS AND RISKS

## NOTHING REPLACES EXPERIENCE

Our KAYSER SERVICE® teams have been performing installation & service work in bag filters for over 40 years. We work efficiently and with the highest precision. Our experienced teams work on single or multiple shifts to ensure that your filter unit returns to operation on-time and ready to operate at the highest performance with low outlet dust emissions and a low differential pressure.

## RELIABILITY, QUALITY AND FLEXIBILITY

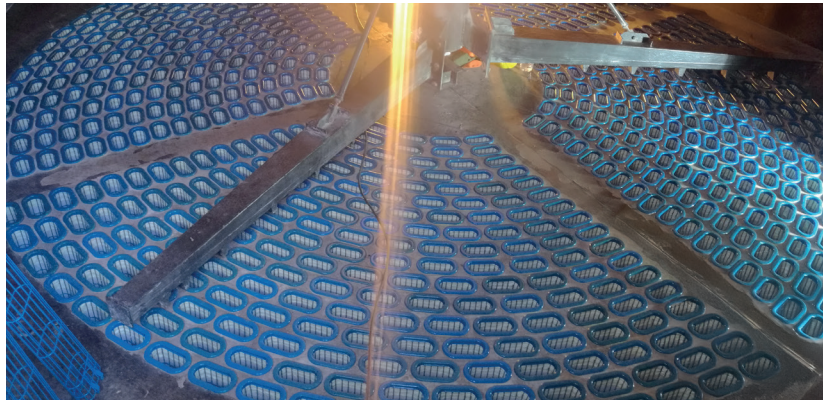

We perform all services on schedule, whether assembly of filter elements, inspections or revisions. Even with a short lead-time, we are capable of performing comprehensive tasks fast and reliably.

## CLEANLINESS

We know that the outlet emissions are a critical point for all industrial processes whilst in operation. However, in some applications, even during the outage, the release of certain substances must be contained. We provide an almost emission-free solution with bag change activities which can take place within a contained environment using our "FilterFix" solution. Contact us for more details.

## OCCUPATIONAL SAFETY

We make no compromises regarding the occupational safety of our staff members. Our service department is SCC certified. Every staff member has a personal SCC certificate and regularly participates in safety training.

## YOUR COMPLETE SUPPLIER AND PARTNER FOR THE ENTIRE FILTRATION PROCESS
